## GCSE (9-1)

## **Biology A (Gateway Biology)**

J247/03: Paper 3 (Higher Tier)

General Certificate of Secondary Education

### Mark Scheme for June 2019

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

Annotations available in RM Assessor

| Annotation  | Meaning                                |
|---|--|
| <ul> <li>Image: A start of the start of</li></ul> | Correct response                       |
| ×   | Incorrect response                     |
|   | Omission mark                          |
| BOD   | Benefit of doubt given                 |
| CON   | Contradiction                          |
| RE  | Rounding error                         |
| SF  | Error in number of significant figures |
| ECF   | Error carried forward                  |
| L1  | Level 1                                |
| L2  | Level 2                                |
| L3  | Level 3                                |
| NBOD  | Benefit of doubt not given             |
| SEEN  | Noted but no credit given              |
| I   | Ignore                                 |

Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

| Annotation   | Meaning   |
|--------------|---|
| 1            | alternative and acceptable answers for the same marking point |
| ✓            | Separates marking points                                      |
| DO NOT ALLOW | Answers which are not worthy of credit                        |
| IGNORE       | Statements which are irrelevant                               |
| ALLOW        | Answers that can be accepted                                  |
| ()           | Words which are not essential to gain credit                  |
| —            | Underlined words must be present in answer to score a mark    |
| ECF          | Error carried forward   |
| AW           | Alternative wording   |
| ORA          | Or reverse argument   |

June 2019

#### Subject-specific Marking Instructions

#### INTRODUCTION

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

#### J247-03

Mark Scheme The breakdown of Assessment Objectives for GCSE (9-1) in Biology A:

|        | Assessment Objective   |
|--------|--|
| AO1    | Demonstrate knowledge and understanding of scientific ideas and scientific techniques and procedures.  |
| AO1.1  | Demonstrate knowledge and understanding of scientific ideas.   |
| AO1.2  | Demonstrate knowledge and understanding of scientific techniques and procedures.   |
| AO2    | Apply knowledge and understanding of scientific ideas and scientific enquiry, techniques and procedures.                                       |
| AO2.1  | Apply knowledge and understanding of scientific ideas.   |
| AO2.2  | Apply knowledge and understanding of scientific enquiry, techniques and procedures.  |
| AO3    | Analyse information and ideas to interpret and evaluate, make judgements and draw conclusions and develop and improve experimental procedures. |
| AO3.1  | Analyse information and ideas to interpret and evaluate.   |
| AO3.1a | Analyse information and ideas to interpret.  |
| AO3.1b | Analyse information and ideas to evaluate.   |
| AO3.2  | Analyse information and ideas to make judgements and draw conclusions.   |
| AO3.2a | Analyse information and ideas to make judgements.  |
| AO3.2b | Analyse information and ideas to draw conclusions.   |
| AO3.3  | Analyse information and ideas to develop and improve experimental procedures.  |
| AO3.3a | Analyse information and ideas to develop experimental procedures.  |
| AO3.3b | Analyse information and ideas to improve experimental procedures.  |
