

**UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS**  
International General Certificate of Secondary Education

**MARK SCHEME for the May/June 2011 question paper**  
**for the guidance of teachers**

**0625 PHYSICS**

**0625/21**

Paper 2 (Core Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

## NOTES ABOUT MARK SCHEME SYMBOLS & OTHER MATTERS

- B marks** are independent marks, which do not depend on any other marks. For a B mark to be scored, the point to which it refers must actually be seen in the candidate's answer.
- M marks** are method marks upon which accuracy marks (A marks) later depend. For an M mark to be scored, the point to which it refers **must** be seen in a candidate's answer. If a candidate fails to score a particular M mark, then none of the dependent A marks can be scored.
- C marks** are compensatory method marks which can be scored even if the points to which they refer are not written down by the candidate, provided subsequent working gives evidence that they must have known it. e.g. if an equation carries a C mark and the candidate does not write down the actual equation but does correct working which shows he knew the equation, then the C mark is scored.
- A marks** are accuracy or answer marks which either depend on an M mark, or which are one of the ways which allow a C mark to be scored.
- c.a.o.** means "correct answer only".
- e.c.f.** means "error carried forward". This indicates that if a candidate has made an earlier mistake and has carried his incorrect value forward to subsequent stages of working, he may be given marks indicated by e.c.f. provided his subsequent working is correct, bearing in mind his earlier mistake. This prevents a candidate being penalised more than once for a particular mistake, but **only** applies to marks annotated "e.c.f."
- e.e.o.o.** means "each error or omission".
- brackets ( )** around words or units in the mark scheme are intended to indicate wording used to clarify the mark scheme, but the marks do not depend on seeing the words or units in brackets. e.g. 10 (J) means that the mark is scored for 10, regardless of the unit given.
- underlining** indicates that this must be seen in the answer offered, or something very similar.
- OR/or** indicates alternative answers, any one of which is satisfactory for scoring the marks.
- Spelling** Be generous about spelling and use of English. If an answer can be understood to mean what we want, give credit.
- Significant figures** Answers are acceptable to any number of significant figures  $\geq 2$ , except if specified otherwise, or if only 1 sig.fig. is appropriate.
- Units** Incorrect units are not penalised, except where specified. More commonly, marks are allocated for specific units.
- Fractions** These are only acceptable where specified.
- Extras** Ignore extras in answers if they are irrelevant; if they contradict an otherwise correct response or are forbidden by mark scheme, use right + wrong = 0
- Ignore** Indicates that something which is not correct is disregarded and does not cause a right plus wrong penalty.
- Not/NOT** Indicates that an incorrect answer is not to be disregarded, but cancels another otherwise correct alternative offered by the candidate i.e. right plus wrong penalty applies.

Page 3	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2011	0625	21

- 1 (a) 60.4 – 44.2  
16.2 (cm<sup>3</sup>) C1  
A1
- (b) (density =) mass/volume in any form, letters, words, numbers C1  
40.5/16.2 e.c.f. C1  
2.5 e.c.f. A1  
g/cm<sup>3</sup> B1  
(accept correct conversion kg/m<sup>3</sup>, with unit)
- (c) 60.4 and 40.5 both ticked –1 e.e.o.o. B2 [8]
- 2 (a) molecules/particles/atoms moving (accept vibrating/oscillating) C1  
molecules colliding (accept with each other) C1  
molecules colliding with walls A1
- (b) (i) LH graph – temperature/ $T/\theta$ / °C/K on horizontal axis } M1  
RH graph – volume/ $V$ / m<sup>3</sup>/cm<sup>3</sup> on horizontal axis }
- (ii) X on LH graph at intersection of line and vertical axis A1 [5]
- 3 (a) idea that non-renewable sources are finite / get used up B1
- (b) (i) solar/sun/sunlight (ignore just light) }  
wind/éolienne accept windmill } any 1 M1  
waves (ignore sea)  
tidal (ignore sea)  
hydro(electric) (ignore water)  
geothermal  
biomass
- (ii) high cost/low effectiveness }  
small output } any 1 (ignore efficiency) A1  
environmental impact  
cannot be relied upon (wind/solar)

Page 4	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2011	0625	21

- (c) (i) fossil fuel  
 coal  
 oil  
 petrol  
 (natural) gas  
 peat  
 nuclear  
 lignite
- } any 1 M1
- (ii) plentiful/regular/constant/reliable supply  
 cheap/cost effective  
 high output
- } any 1 A1 [5]
- 4 (a) cool air more dense OR cool air falls  
 OR warm air rises so it can be cooled B1
- (b) energy/heat removed from store must be released outside store  
 heat developed by refrigeration unit B1  
 B1
- (c) reduce/prevent heat coming in from outside NOT cold getting out  
 reduce/prevent conduction NOT convection/radiation B1  
 B1
- (d) idea that heat gained from outside = heat removed by refrigeration unit  
 allow B1 for idea of thermostatic control B2 [7]
- 5 (a) boxes 1 and 4 ticked –1 e.e.o.o. B2
- (b) sound/wave reflected/bounces back (from surface) NOT just “returns” B1
- (c) (i) cliff A B1
- (ii) (s =) vt OR (s =) vt/2 in any form..... allow s = ut + ½at<sup>2</sup> C1
- 330 × 1.5 OR 495  
 OR 330 × 0.75 OR 247.5  
 OR 330 × 2.5 OR 825  
 OR 330 × 1.25 OR 412.5  
 OR 330 × 4 OR 1320  
 OR 330 × 2  
 660 (m)
- } C1
- A1
- (iii) both echoes at the same time OR one echo OR louder  
 time value quoted between 1.5s and 2.5s B1  
 B1 [9]

Page 5	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2011	0625	21

- 6 (a) ray bent down at 1<sup>st</sup> surface, but not beyond/along normal B1  
ray bent down at 2<sup>nd</sup> surface, but not beyond/along surface B1  
MAX 1 mark if any suggestion of a spectrum shown
- (b) spot/dot/line AND of one colour accept a single named colour e.g. red B1
- (c) spectrum/colours/light dispersed ignore rainbow C1  
red at top and violet at bottom in words in space provided A1 [5]
- 7 (a) spheres closer together allow touching spheres B1
- (b) (i) charging (of anything) by friction/rubbing B1  
plastic/furniture (becomes) charged OR electron/charge transfer M1  
plastic/furniture attracts dust/fluff A1
- (ii) idea of charge leaking B1  
water is a conductor B1 [6]
- 8 (a) (i) parallel B1
- (ii) 4.2 (V) B1
- (iii)  $V=IR$  in any form OR  $V/R$  C1  
4.2 / 3 e.c.f. (ii) C1  
1.4 e.c.f. (ii) A1  
A OR amp(s) OR ampere(s) B1
- (iv) 1. bigger OR the sum of the two currents OR 2 (A) B1  
2. same/equal B1
- (b) clear series connection of all 3 across battery in one circuit B1  
clear parallel connection of all 3 across battery in other circuit, and must not be shorted out B1  
allow B1 max in (b) if correct series/parallel circuits both shown, but with more or less than 3 resistors in either/both [10]

Page 6	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2011	0625	21

- 9 (a) all 3 lamps in parallel across battery + switch  
(–1 if any lamps in series, –1 if connections across battery only) B2
- (b) (i) molecules vibrate over bigger distance OR molecules separate  
OR bigger space between molecules  
NOT just “molecules need more space”  
ignore breaking bonds B1
- (ii) 1. bends ignore expands B1  
bends/moves to the right/away from contact/outwards/towards invar strip B1  
2. idea that something gets hot M1  
idea that bimetallic strip/invar/brass bends/breaks circuit A1  
idea that something cools (when no current) M1  
idea that bimetallic strip/invar/brass straightens/makes contact A1 [9]
- 10 (a) (i) Fig. 10.1 B1
- (ii) Fig. 10.3 B1
- (b) 2 complete cycles, any shape (if full-wave rectified, must be 4 humps)  
cyclical and equal amplitude above & below axis B1  
uniform spacing B1  
intention of sinusoidal shape accept sinusoidal full-wave rectification B1 [6]
- 11 (a) thermionic emission B1
- (b) (i)  $S_2$  OR 2  
(ii)  $S_1$  OR 1 ignore mention of  $S_2$   
(iii)  $S_3$  OR 3 ignore mention of  $S_1$  and/or  $S_2$  } any 1 correct B1 }  
all 3 correct B2 } B2
- (c) reverse polarity of plates (however expressed)/make upper plate positive  
OR correct description of use of magnet B1 [4]
- 12 (a) (radio)activity OR count rate OR counts/s OR particles emitted/s  
OR rate of decay OR number of undecayed atoms/nuclei  
OR radiation OR original number of atoms/nuclei B1  
NOT mass/substance/material, unless clearly specified  
to decrease to half (original value) NOT half the time B1
- (b) (i)  $53 \pm 1$  (s) B1
- (ii)  $84 \pm 1$  (s) B1
- (iii) candidate's (ii) + candidate's (i) C1  
correct evaluation of candidate's (ii) + candidate's (i) A1 [6]
