BIOLOGY

0970/21

Paper 2 Multiple Choice (Extended)

May/June 2023

45 minutes

You must answer on the multiple choice answer sheet.

You will need: Multiple choice answer sheet
Soft clean eraser
Soft pencil (type B or HB is recommended)

INSTRUCTIONS

- There are **forty** questions on this paper. Answer **all** questions.
- For each question there are four possible answers **A, B, C** and **D**. Choose the **one** you consider correct and record your choice in soft pencil on the multiple choice answer sheet.
- Follow the instructions on the multiple choice answer sheet.
- Write in soft pencil.
- Write your name, centre number and candidate number on the multiple choice answer sheet in the spaces provided unless this has been done for you.
- Do **not** use correction fluid.
- Do **not** write on any bar codes.
- You may use a calculator.

INFORMATION

- The total mark for this paper is 40.
- Each correct answer will score one mark.
- Any rough working should be done on this question paper.

This document has **16** pages. Any blank pages are indicated.

2

1 What are characteristics of all organisms?

- A egestion and excretion
- B egestion and nutrition
- C excretion and nutrition
- D excretion and photosynthesis

2 The scientific name for the golden eagle is *Aquila chrysaetos*.

What is the genus of the golden eagle?

- A *Aquila*
- B *chrysaetos*
- C eagle
- D golden

3 Which row shows structures that are present in both root hair cells and palisade mesophyll cells?

	cell wall	chloroplasts	cytoplasm	vacuole
A	✓	✓	✓	x
B	x	✓	✓	✓
C	✓	x	✓	✓
D	✓	✓	x	✓

key

✓ = present

x = absent

4 The photomicrograph shows a plant cell. The length of line XY is 90 mm. The actual length of the cell is 30 μm.

What is the magnification of the photomicrograph?

- A ×300
- B ×3000
- C ×33 000
- D ×330 000

3

- 5 The diagram shows an experiment demonstrating osmosis using a dialysis tubing bag.

After 30 minutes, the level of the liquid in the glass tube goes1..... because the water had a2..... water potential than the sugar solution.

Which words correctly complete the statement?

	1	2
A	down	lower
B	down	higher
C	up	lower
D	up	higher

- 6 The diagram shows the movement of glucose molecules across a cell membrane.

Which statement describes molecule T?

- A It is a fat molecule used to transport glucose down a concentration gradient.
 - B It is a fat molecule used to transport glucose against a concentration gradient.
 - C It is a protein molecule used to transport glucose down a concentration gradient.
 - D It is a protein molecule used to transport glucose against a concentration gradient.
- 7 The diagram shows part of a protein molecule.

What does X represent?

- A amino acid
 - B fatty acid
 - C glycerol
 - D sugar
- 8 The structure of DNA involves two strands coiled together to form a double helix.
- Which pairing of bases between the two strands is correct?
- A A and G
 - B A and T
 - C C and A
 - D C and T

9 What is true of **all** enzymes?

	they are sugars	they are most effective at pH7	
A	✓	✓	key
B	✓	✗	✓ = yes
C	✗	✓	✗ = no
D	✗	✗	

10 Which statement about human enzymes is correct when they are at temperatures above 80 °C?

- A** The enzyme molecules are denatured.
- B** The shape of the active site is stable.
- C** More enzyme-substrate complexes form.
- D** More product is formed by the enzyme.

11 An experiment is set up to investigate gas exchange in aquatic plants.

The hydrogencarbonate indicator solution is orange at the start.

Which colour is it after three hours?

- A** blue-black
- B** orange
- C** purple
- D** yellow

12 Certain factors are needed for photosynthesis.

If a factor is in short supply, it limits the rate of photosynthesis.

Which of these could be limiting factors?

- 1 carbon dioxide
- 2 oxygen
- 3 light intensity

A 1 and 2 **B** 1 and 3 **C** 2 and 3 **D** 3 only

13 The haemoglobin concentration in the blood of a person is 80g/dm^3 . The accepted normal concentration is 120g/dm^3 or above.

Which substance may be lacking in their diet?

- A** calcium
- B** fats
- C** fibre
- D** iron

14 Which statement about physical digestion is correct?

- A** It increases the surface area of food.
- B** It involves enzymes.
- C** It takes place in the mouth only.
- D** It produces smaller molecules.

15 Which statement describes the effect of atmospheric humidity on the rate of transpiration?

- A** In high humidity, the transpiration rate is high because there is slow diffusion of water vapour through stomata.
- B** In high humidity, the transpiration rate is low because there is rapid diffusion of water vapour through stomata.
- C** In low humidity, the transpiration rate is high because there is rapid diffusion of water vapour through stomata.
- D** In low humidity, the transpiration rate is low because there is slow diffusion of water vapour through stomata.

16 Sucrose and amino acids move around a plant from sources to sinks.

Which row shows the sources and sinks?

	root cortex cells	xylem vessels	palisade mesophyll cells
A	source and sink	neither	source
B	sink	sink	source and sink
C	neither	source and sink	sink
D	source and sink	source	neither

17 Which statements describe how the structures in the circulatory system function?

- 1 a muscular pump to push blood into vessels
- 2 valves to ensure one-way blood flow
- 3 veins to take blood away from the heart
- 4 vessels to return blood to the heart

A 1, 2 and 3 **B** 1, 2 and 4 **C** 1, 3 and 4 **D** 2, 3 and 4

18 The diagram shows a section through the heart.

Which part is the septum?

19 The cholera bacterium toxin causes dehydration and loss of salts from the blood in humans.

Which statement explains the reason for this?

- A Chloride ions are secreted into the small intestine where they increase the water potential.
- B Chloride ions are secreted into the small intestine which causes water to move into the intestine by osmosis.
- C Chloride ions are secreted into the small intestine which causes water to move out of the intestine by osmosis.
- D Chloride ions are secreted into the small intestine which causes the water potential of the blood to decrease.

20 During inspiration, the processes listed take place.

- P volume of the thorax increases
- Q air rushes into the lungs
- R pressure in the thorax decreases
- S external intercostal muscles contract
- T diaphragm moves down, ribs move upwards and outwards

What is the correct sequence for these processes?

- A Q → P → S → R → T
 - B S → T → P → R → Q
 - C Q → P → S → T → R
 - D S → Q → R → P → T
- 21 In the chemical equation for anaerobic respiration in yeast, the numbers have been replaced by the letters W, X, Y and Z.

Which number is Z?

- A 2
- B 5
- C 6
- D 12

22 A student measured their oxygen consumption before, during and after exercise.

The results are shown in the graph.

At which time is the oxygen debt being removed?

- A 5–10 minutes
- B 5–15 minutes
- C 15–20 minutes
- D 20–25 minutes

23 Which row shows where glucose will be found in the body of a healthy human after eating a meal?

	renal artery	renal vein	glomerulus	nephron	ureter
A	yes	no	yes	yes	yes
B	yes	yes	no	no	no
C	yes	yes	yes	yes	no
D	no	yes	no	no	yes

24 The events listed involve neurotransmitter molecules at a synapse.

- 1 They bind with receptor proteins.
- 2 They diffuse across the synaptic gap.
- 3 They enter the synaptic gap.
- 4 They are released from vesicles.

What is the sequence of events that occur when an impulse arrives at the synapse?

- A** 3 → 2 → 1 → 4
B 4 → 3 → 1 → 2
C 3 → 4 → 1 → 2
D 4 → 3 → 2 → 1

25 What occurs during accommodation to focus on distant objects?

	ciliary muscle	lens shape	suspensory ligaments
A	contracts	fat	slack
B	relaxes	thin	tight
C	contracts	fat	tight
D	relaxes	thin	slack

26 What is a correct statement about auxin in shoots?

- A** It is made only on the shaded side of the shoot.
B It is more concentrated on the side of the shoot that receives the most light.
C It moves through the shoot by osmosis.
D It stimulates cell elongation.

27 What is a correct statement about antibiotics?

- A** Bacteria may become resistant to antibiotics as a result of artificial selection.
B Bacteria may become resistant to antibiotics as a result of natural selection.
C Viruses may become resistant to antibiotics as a result of artificial selection.
D Viruses may become resistant to antibiotics as a result of natural selection.

- 28 Potatoes are stem tubers. A tuber can be placed in the ground to grow into another plant, which can grow many more tubers.

The diploid number of the potato plant is 24.

How many chromosomes will there be in the cells of the stem, the leaf and the pollen?

	stem	leaf	pollen
A	24	24	12
B	24	12	48
C	48	12	24
D	48	48	12

- 29 Which row about asexual reproduction is correct?

	number of parents	offspring identical to parents	offspring identical to each other
A	one	no	yes
B	one	yes	yes
C	two	no	no
D	two	yes	no

30 The statements describe how a protein is made.

- 1 mRNA passes through a ribosome.
- 2 mRNA molecules carry a copy of the gene to the cytoplasm.
- 3 The gene coding for the protein is copied in the nucleus.
- 4 Ribosomes assemble amino acids into proteins.

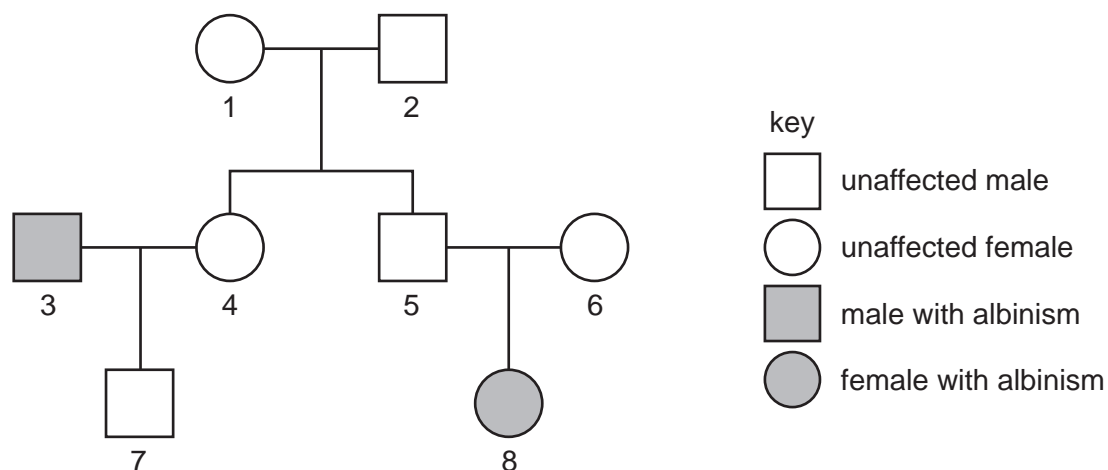

What is the order of statements that describes how a protein is made?

- A 2 → 1 → 3 → 4
 B 2 → 3 → 4 → 1
 C 3 → 1 → 2 → 4
 D 3 → 2 → 1 → 4

31 Which parents could produce offspring with blood group O?

- A heterozygous father with blood group A and heterozygous mother with blood group B
 B heterozygous father with blood group A and homozygous mother with blood group B
 C homozygous father with blood group A and heterozygous mother with blood group B
 D homozygous father with blood group A and homozygous mother with blood group O

32 The diagram shows the inheritance of albinism in one family. Albinism is an inherited condition caused by a recessive allele.

Which individuals **must** be heterozygous for this condition?

- A 1 and 2 B 4 and 7 C 5, 6 and 7 D 5 and 6 only

33 Which term is a genetic change?

- A allele
- B genotype
- C mutation
- D phenotype

34 Which adaptation may be present in a xerophyte?

- A leaves with small surface area and large numbers of stomata
- B little or no xylem tissue and leaves with large surface area
- C stomatal hairs and rolled leaves
- D thin or no cuticle and deep roots

35 The diagram shows energy flow from the Sun, through a food chain and into the environment.

What is the form of energy for each numbered arrow?

	stage 1	stage 2
A	heat	chemical
B	heat	kinetic
C	light	chemical
D	light	kinetic

36 A few yeast cells were placed in a container of nutrient solution.

The graph shows how their population size changed over time.

Which row shows when the reproduction rate was greater than the death rate for the numbered phases on the graph?

	reproduction rate greater than death rate			
	1	2	3	4
A	✓	✓	✓	✗
B	✓	✓	✗	✗
C	✓	✗	✗	✗
D	✗	✓	✓	✓

key

✓ = yes

✗ = no

37 The number of Atlantic bluefin tuna fish found in the Atlantic Ocean has significantly decreased in the last 50 years.

Which method would make the biggest improvement in the conservation of tuna fish stocks?

- A** decreasing the size of holes in fishing nets
- B** genetic modification of tuna
- C** introducing fishing quotas
- D** selective breeding of tuna

38 The bloodworm is an organism that is found in heavily polluted water.

The diagram shows where raw sewage flows into a river.

Where would there be fewest bloodworms?

39 The diagram shows a bacterial cell.

Which part is useful in genetic modification?

40 Which statement about genetic modification is correct?

- A It involves choosing which individual organisms are used for breeding.
- B It is always done using genes from the same species.
- C It produces a new combination of genes.
- D It produces exact copies of individual organisms.
