PHYSICS **0625/22**

Paper 2 Multiple Choice (Extended) **February/March 2023**

45 minutes

You must answer on the multiple choice answer sheet.

You will need: Multiple choice answer sheet
Soft clean eraser
Soft pencil (type B or HB is recommended)

INSTRUCTIONS

● There are **forty** questions on this paper. Answer **all** questions.
● For each question there are four possible answers **A**, **B**, **C** and **D**. Choose the **one** you consider correct and record your choice in soft pencil on the multiple choice answer sheet.
● Follow the instructions on the multiple choice answer sheet.
● Write in soft pencil.
● Write your name, centre number and candidate number on the multiple choice answer sheet in the spaces provided unless this has been done for you.
● Do **not** use correction fluid.
● Do **not** write on any bar codes.
● You may use a calculator.
● Take the weight of 1.0 kg to be 9.8 N (acceleration of free fall = 9.8 m/s^2).

INFORMATION

● The total mark for this paper is 40.
● Each correct answer will score one mark.
● Any rough working should be done on this question paper.

This document has **16** pages. Any blank pages are indicated.

[Turn over

1 Which list contains two scalar quantities and two vector quantities?

   A distance, speed, time, velocity

   B force, velocity, distance, mass

   C mass, energy, temperature, momentum

   D weight, acceleration, momentum, speed

2 The diagram shows the speed–time graph for a car.

Which row describes the motion of the car at point X and at point Y?

	point X	point Y
A	at rest	moving with constant speed
B	moving with constant speed	at rest
C	moving with changing speed	at rest
D	moving with changing speed	moving with constant speed

3 Four objects are moving in a straight line.

The table shows the distances moved by each object in each second of its motion.

Which object is moving with constant non-zero acceleration?

	distance moved in 1st second/m	distance moved in 2nd second/m	distance moved in 3rd second/m	distance moved in 4th second/m
A	5	5	5	5
B	5	6	7	8
C	5	7	10	14
D	5	8	14	26

4 The drag force on a car increases with speed. At 20 m/s, the total drag force is 400 N. The mass of the car is 1200 kg and the driving force is constant at 700 N.

Which statement about the acceleration of the car at 20 m/s is correct?

A   The acceleration is 0.25 m/s^2 but will decrease as time passes.

B   The acceleration is 0.25 m/s^2 but will increase as time passes.

C   The acceleration is 0.58 m/s^2 but will decrease as time passes.

D   The acceleration is 0.58 m/s^2 but will increase as time passes.

5 A rectangular swimming pool is 50 m long and 25 m wide.

It contains water at a depth of 2 m.

The density of the water is 1000 kg/m^3.

What is the mass of the water in the pool?

A   2.5 kg   B   2500 kg   C   77 000 kg   D   2 500 000 kg

6 An object is rising vertically at constant speed through water. There are three vertical forces acting on it: the weight W, the drag force D, and the upward force U.

Which diagram shows the magnitude and direction of the vertical forces acting on the object?

A   B   C   D

$U = 3.0$ N

$U = 2.0$ N $D = 2.0$ N $U = 2.0$ N $U = 3.0$ N

$D = 1.0$ N

$W = 1.0$ N $D = 1.0$ N $D = 1.0$ N

$W = 2.0$ N

$W = 3.0$ N $W = 3.0$ N

7 Two boys of equal weight sit on one side of a see-saw, as shown. Their father, of weight 1000 N, sits on the other side. The see-saw is balanced and is being used so that it moves up and down.
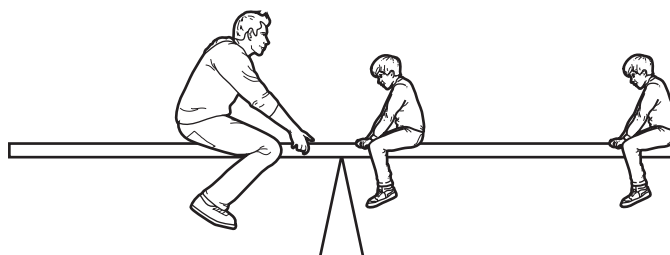

During one part of the cycle, the father descends through a distance of 40 cm. At the same time, the boy nearest the pivot rises through 20 cm, while the other boy rises through 80 cm.

What is the weight of each boy?

A 200 N **B** 400 N **C** 600 N **D** 800 N

8 A student measures the length of a spring. She then attaches different weights to the spring. She measures the length of the spring for each weight.

The table shows her results.

weight/N	length/mm
0	520
1.0	524
2.0	528
3.0	533
4.0	537
5.0	540

What is the extension of the spring with a weight of 3.0 N attached to it?

A 4 mm **B** 5 mm **C** 12 mm **D** 13 mm

9 The momentum of a body is changed by a force acting on it for a period of time.

Which action increases the change in momentum?

A doubling the force and halving the time

B doubling the force for the same time

C halving both the force and the time

D halving the force and doubling the time

10 The equation used to find the change in gravitational potential energy of an object can be written as

$$\Delta E_P = Y \times Z \times \Delta h$$

where ΔE_P is the change in gravitational energy and Δh is the change in height.

Which row gives the quantities Y and Z?

	Y	Z
A	mass	gravitational field strength
B	gravitational field strength	density
C	density	speed
D	speed	mass

11 A machine has a power input of 200 W and a useful output energy of 1 kJ in 6 minutes.
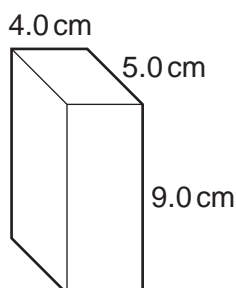

What is the efficiency of the machine?

A 0.014% **B** 0.83% **C** 1.4% **D** 83%

12 What is the unit of power?

A joule

B newton

C volt

D watt

13 The diagram shows a rectangular block of weight 16 N. It is resting on a flat surface.

4.0 cm
5.0 cm
9.0 cm

What is the pressure at the base of the block due to its weight?

A 0.089 N/cm^2

B 0.36 N/cm^2

C 0.80 N/cm^2

D 320 N/cm^2

 [Turn over

14 An oil tank has a base of area 2.5 m^2 and is filled with oil to a depth of 1.2 m.

The density of the oil is 800 kg/m^3.

What is the force exerted on the base of the tank due to the oil?

A 940 N **B** 2400 N **C** 9400 N **D** 24 000 N

15 A sample of gas is trapped in a rigid container. As the temperature of the gas is increased, the pressure increases.

Which statement is **not** correct?

A The gas molecules have greater kinetic energy.

B The gas molecules hit the walls of the container harder.

C The gas molecules hit the walls of the container more frequently.

D The gas molecules move further apart.

16 What happens when the temperature of a liquid increases?

A The mass of the liquid increases, making the liquid less dense.

B The mass of the liquid increases, making the liquid more dense.

C The volume of the liquid increases, making the liquid less dense.

**D** The volume of the liquid increases, making the liquid more dense.

17 A bar of metal, which is a good thermal conductor, is heated at one end.

What is the main method of transfer of thermal energy along the bar?

A lattice vibration

B movement of atoms of the metal along the bar

C transfer by electrons

**D** vibration of atoms of the metal bar

18 A transverse wave moves along a rope.

The diagram shows the position of the rope at one particular time.
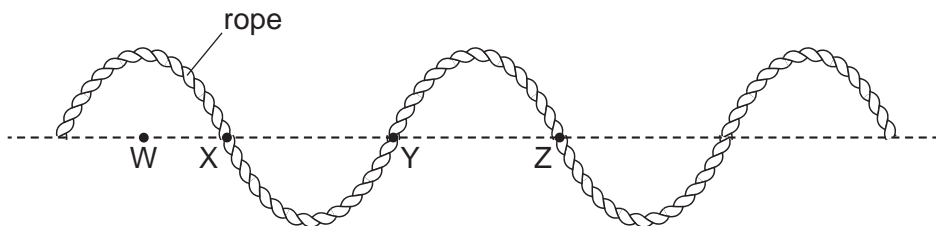

Which two labelled points are one wavelength apart?

A W and X   **B** W and Z   **C** X and Z   **D** Y and Z

19 Light in transparent plastic meets a boundary with air. Light is transmitted into the air only if the angle marked θ in the diagram is greater than 36°.
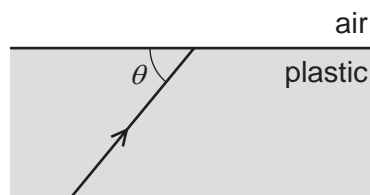

What is the refractive index of the plastic?

A 0.59   **B** 0.81   **C** 1.2   **D** 1.7

20 A thin converging lens has a focal length f. An object O is placed to the left of the lens, as shown.
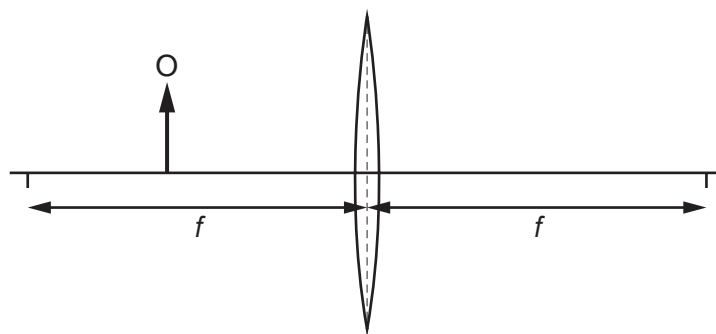

Where is the image formed and how does its size compare to the object?

	image position	image size
A	on the opposite side of the lens to the object	larger than the object
B	on the opposite side of the lens to the object	smaller than the object
C	on the same side of the lens as the object	larger than the object
D	on the same side of the lens as the object	smaller than the object

21 Which diagram shows what happens when a ray of white light passes through a prism?

A

white light

spectrum

B

white light

spectrum

C

spectrum

white light

D

white light

spectrum
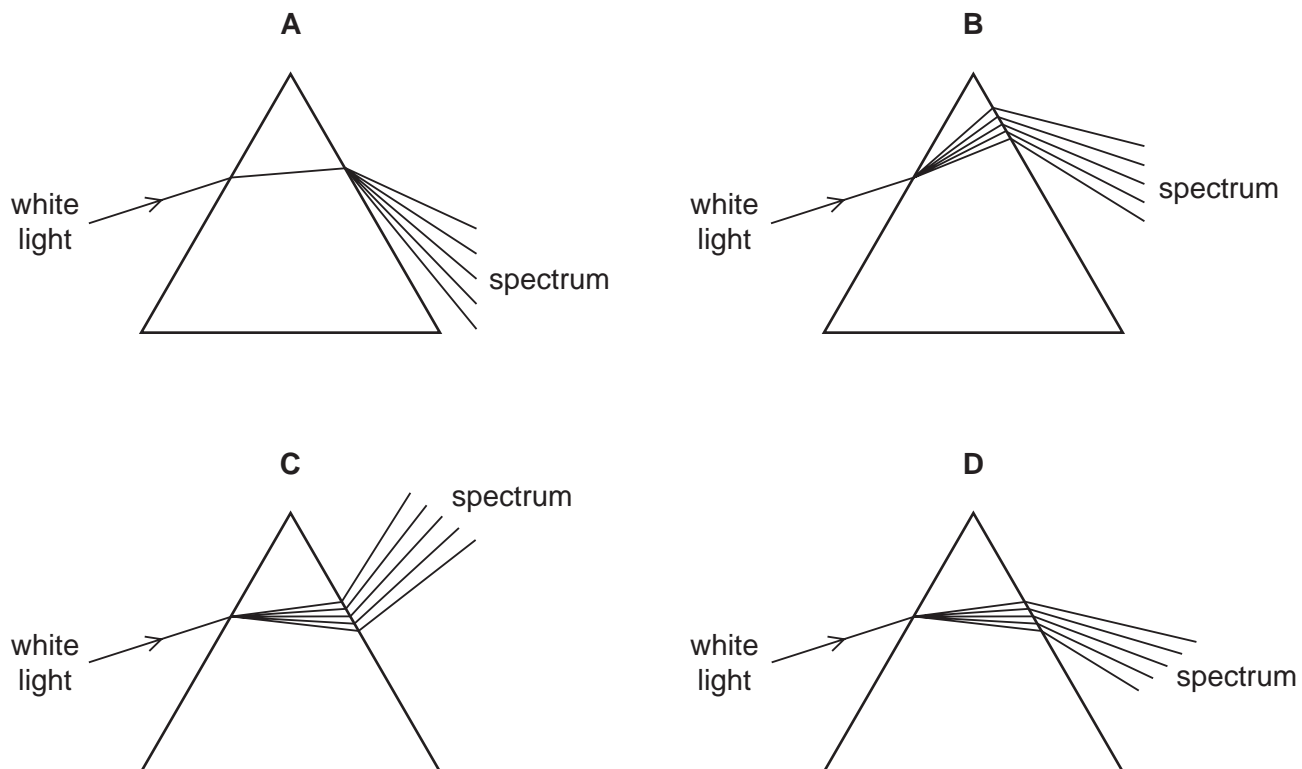

22 A television (TV) station transmits a signal to a television receiving dish.

The television has an on / off indicator light.

The television is switched on by a remote control which changes the indicator light from red to green.

Which electromagnetic wave used in these actions has the longest wavelength?

satellite

A

receiving dish

TV station

TV

B

remote control

indicator light

red   green

C   **D**
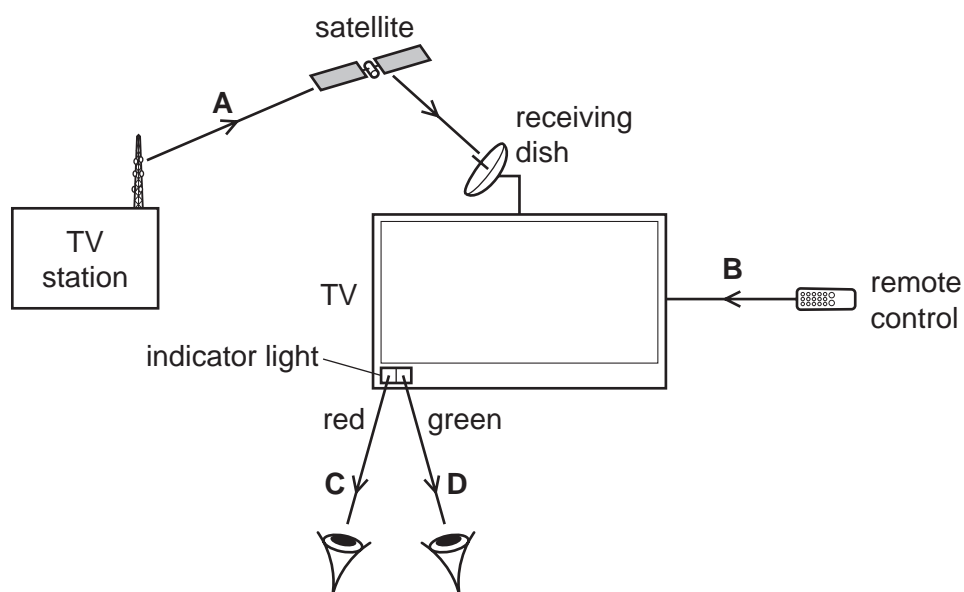

23 A student makes a list of some applications of waves.

      1   medical scanning of soft tissue

      2   sterilising water

      3   using sonar to calculate ocean depths

Which applications use ultrasound waves?

A 1, 2 and 3   **B** 1 and 2 only   **C** 1 and 3 only   **D** 2 and 3 only

24 The diagram shows a bar magnet at rest on a smooth horizontal surface. A length of soft-iron wire is held parallel to the magnet.
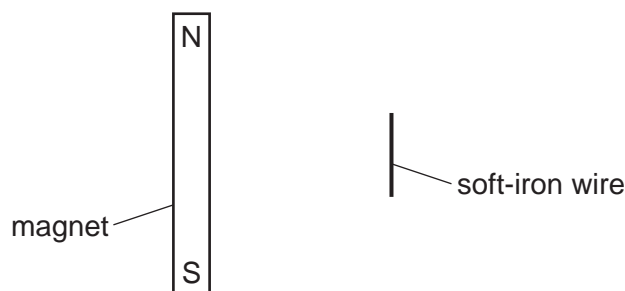

The wire is released.

What happens?

A   The wire moves away from the magnet.

B   The wire moves towards the magnet.

C   The wire's centre stays in its present position and the wire rotates through 90° in a clockwise direction.

D   The wire's centre stays in its present position and the wire rotates through 90° in an anticlockwise direction.

25 Which diagram shows the electric field pattern and direction around a positive point charge?
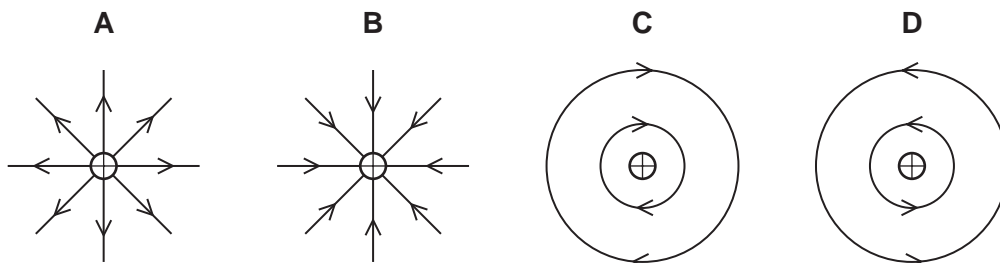

26 A laboratory has a standard wire of known resistance. It also has other wires, made from the same material as the standard wire, but of different lengths and diameters.

Which wire would definitely have a resistance of less than the standard wire?

|	wire length	wire diameter
A	longer	larger
B	longer	smaller
C	shorter	larger
D	shorter	smaller

27 The graph shows the relationship between the current in a circuit component and the potential difference (p.d.) across it. The graph has a straight section and a curved section.
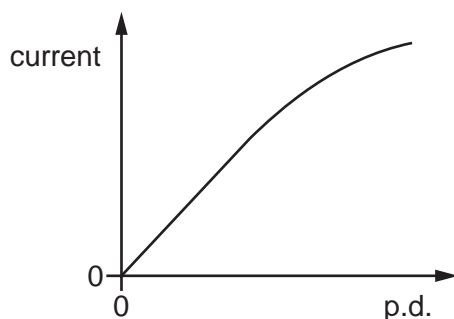

What happens to the resistance of the component in these two sections as the current increases?

|	straight section	curved section
A	resistance increases	resistance decreases
B	resistance increases	resistance increases
C	no change in resistance	resistance decreases
D	no change in resistance	resistance increases

28 The diagram shows part of a circuit.
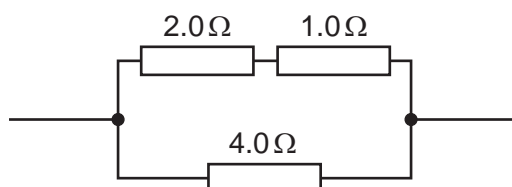

What is the combined resistance of the resistors?

A 0.14 Ω **B** 0.57 Ω **C** 1.7 Ω **D** 7.0 Ω

29 The diagram shows a circuit which includes two resistors and a battery.

10 Ω   30 Ω

V

6.0 V
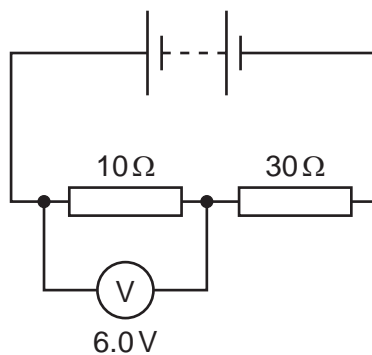

The voltmeter reads 6.0 V.

What is the potential difference across the 30 Ω resistor?

A   2.0 V   **B**   6.0 V   **C**   18 V   **D**   24 V

30 A wire is moved down in a direction perpendicular to the magnetic field.

Three changes are suggested.

    1   The speed of the movement of the wire is increased.

    2   The magnetic field strength is decreased.

    3   The direction of the magnetic field is reversed.

Which changes increase the electromotive force (e.m.f.) induced in the wire?

A   1 and 3   **B**   1 only   **C**   2 and 3   **D**   3 only

31 A wire is moved across a magnetic field. This causes an induced current in the wire.

The induced current interacts with the magnetic field to produce a force on the wire.

In which direction is this force?

A in the direction of the current

B in the direction of movement of the wire

C in the opposite direction to the current

D in the opposite direction to the movement of the wire

32 A 100% efficient step-down transformer has primary voltage V_p and primary current I_p.

Which row compares the secondary voltage with V_p and the secondary current with I_p?

	secondary voltage	secondary current
A	greater than V_p	greater than I_p
B	greater than V_p	less than I_p
C	less than V_p	greater than I_p
D	less than V_p	less than I_p

33 The scattering of α-particles by a thin metal foil supports the nuclear model of an atom.

Why are α-particles used rather than neutrons?

A because they always travel more slowly

B because they are heavier

C because they are larger in diameter

D because they have a positive charge

34 An iron nuclide is represented by the symbol shown.

$$^{56}_{26}\text{Fe}$$
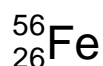

Which statements about a nucleus of this iron nuclide are correct?

1 The nucleus contains 56 neutrons.

2 The nucleon number is 30.

3 The proton number is 26.

A 1 and 2   **B** 1 and 3   **C** 2 and 3   **D** 3 only

35 A sample of a radioactive isotope has an initial rate of emission of 128 counts per minute and a half-life of 4 days.

How long will it take for the rate of emission to fall to 32 counts per minute?

A 2 days   **B** 4 days   **C** 8 days   **D** 12 days

36 Several scientists are working in a laboratory. The scientists are experimenting with sources which emit ionising radiation. Each scientist is given a list of safety rules.

Three of the rules are shown.

     1   Keep at least 2 m away from other people.

     2   Do not stay longer than 4 hours per day in the laboratory.

     3   Stay behind the lead-lined screen.

Which safety rules are for protection against the effects of ionising radiation?

A 1, 2 and 3   **B** 1 and 2 only   **C** 1 and 3 only   **D** 2 and 3 only

37 Which data is needed to calculate the average orbital speed of a satellite around a planet?

	the distance of the satellite from the centre of the planet	the radius of the planet	the period of rotation of the planet	the time for the satellite to orbit the planet once
A	✓	✓	✓	✗
B	✓	✗	✗	✓
C	✗	✓	✓	✗
D	✓	✓	✗	✓

key

✓ = needed

✗ = not needed

38 Approximately how long does it take for the Moon to make one complete orbit of the Earth?

A 24 hours

B 1 month

C 1 season

D 1 year

39 The energy generated in stable stars comes from nuclear reactions.

Which type of reaction occurs in the Sun?

A Helium nuclei break up to give hydrogen nuclei.

B Helium nuclei join together to form hydrogen nuclei.

C Hydrogen nuclei break up to give helium nuclei.

D Hydrogen nuclei join together to form helium nuclei.

40 Two quantities define the Hubble constant H_0.

- the speed at which the galaxy is moving away from the Earth v
- the distance of the galaxy from the Earth d

What is the relationship between v and d and what is the current estimate for H_0?

	relationship	current estimate for H_0
A	v is proportional to d	$2.2 \times 10^{-18}\,\text{s}^{-1}$
B	v is proportional to $\dfrac{1}{d}$	$2.2 \times 10^{-18}\,\text{s}^{-1}$
C	v is proportional to d	$3.0 \times 10^{8}\,\text{m/s}$
D	v is proportional to $\dfrac{1}{d}$	$3.0 \times 10^{8}\,\text{m/s}$
