MARK SCHEME for the October/November 2013 series

0620 CHEMISTRY

0620/53

Paper 5 (Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

| Page 2 | | Mark Scheme | Syllabus | Paper |
|----------------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------|
| | | IGCSE – October/November 2013 | 0620 | 53 |
| ini to | tial and 1 deci | esults for Experiment 1 d final volumes and differences completed correct mal place (1) ble to supervisors (1) ±2 cm ³ | tly (1) | [(|
| init to | tial and 1 deci | esults for Experiment 2 d final volumes and differences completed correct mal place (1) ble to supervisors (1) ±2 cm ³ | y (1) | [: |
| pre | een (1) ecipita | | | max [ź |
| (d) (i) | | urless / pale green not clear to yellow / pink (1) / purple to colourless | | [|
| (ii) | | an acid / alkali reaction or potassium manganate is needed / would interfere (1) | s coloured / owtte | [|
| (e) (i) | expe | eriment 2 (1) | | [|
| (ii) | expe | eriment 2 2x volume experiment 1 | | [|
| (iii) | | tion E more concentrated / stronger (1) or convers s concentrated (2) | e | [|
| | | e from table result for experiment 2 (1) me of C used (1) | | [|
| | | ge easy to use / quick / convenient (1) tage not accurate / owtte (1) | | [|
| (h) iro | n (1)(I | I) (1) oxidised to iron(III) / reacted with air (1) | | [|
