

CAMBRIDGE INTERNATIONAL EXAMINATIONS

Cambridge International General Certificate of Secondary Education

MARK SCHEME for the October/November 2015 series**0610 BIOLOGY****0610/23**

Paper 2 (Core Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2015 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

® IGCSE is the registered trademark of Cambridge International Examinations.

Abbreviations used in the Mark Scheme

- ; separates marking points
- / separates alternatives within a marking point
- **R** reject
- **ignore** mark as if this material was not present
- **A** accept (a less than ideal answer which should be marked correct)
- **AW** alternative wording (accept other ways of expressing the same idea)
- underline words underlined (or grammatical variants of them) must be present
- **max** indicates the maximum number of marks that can be awarded
- **mark independently** the second mark may be given even if the first mark is wrong
- **ecf** credit a correct statement that follows a previous wrong response
- () the word / phrase in brackets is not required, but sets the context
- **ora** or reverse argument
- **AVP** any valid point

Question	Answer	Marks	Additional Guidance
1	C (<i>Castor canadensis</i>) B (<i>Lutra lutra</i>) D (<i>Panthera tigris</i>) A (<i>Panthera leo</i>) E (<i>Canis lupus</i>)	[4]	1 correct = 1 mark 2 correct = 2 marks 3 correct = 3 marks 4 or 5 correct = 4 marks
		[Total 4]	
2 (a)	evaporation of water ; from (surface of) mesophyll cells ; (followed by) loss of water vapour ; diffusion of water ; through stomata ; of (plant) leaves ;	max [3]	
(b)	G ; <i>any two from:</i> has largest surface area; (so it has the) greatest number of stomata; more water vapour will escape;	max [3]	A J with <i>two</i> of the following reasons mesophyll cells directly exposed to air ; water vapour escapes without passing through stomata ; so more water vapour will escape ;
(c) (i)	plant lost mass ; (plant lost more mass) during 12 hours in light than during 12 hours in dark / in dark and light for same amount of time ; data (to support) ;	max [2]	
(ii)	(bag) impermeable to water ; prevents loss of water from soil ; water only lost from leaves ; so mass lost is only due to transpiration ;	max [2]

Question	Answer	Marks	Additional Guidance				
(iii)	temperature ; humidity ; wind speed ;	[2]					
		[Total 12]					
3 (a) (i)	X ovary ; Y umbilical cord ; Z uterus ;	[3]					
(ii)	line labelled F ending in oviduct;	[1]					
(iii)	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 50%; text-align: center;">mother to fetus</th> <th style="width: 50%; text-align: center;">fetus to mother</th> </tr> </thead> <tbody> <tr> <td>oxygen ; glucose ; amino acids ; water ; vitamins / named example ; minerals / named example ;</td> <td>carbon dioxide ; urea ;</td> </tr> </tbody> </table>	mother to fetus	fetus to mother	oxygen ; glucose ; amino acids ; water ; vitamins / named example ; minerals / named example ;	carbon dioxide ; urea ;	max [4]	two from each column <i>for mother to fetus</i> A alcohol / drugs / antibodies / carbon monoxide
mother to fetus	fetus to mother						
oxygen ; glucose ; amino acids ; water ; vitamins / named example ; minerals / named example ;	carbon dioxide ; urea ;

	Cambridge IGCSE – October/November 2015	0610	23

Question	Answer	Marks	Additional Guidance
6 (a)	plumule drawn and labelled growing upwards (originating at split in testa) ; radicle drawn and labelled growing downwards (originating at split in testa) ;	[2]	
(b)	geotropism ; phototropism ;	[2]	
		[Total 4]	
7 (a) (i)	R left atrium; S (left) atrioventricular valve / bicuspid valve / mitral valve ; T left ventricle;	[3]	A AV valve / tendinous chord
(ii)	it has to contract more strongly / pump blood a greater distance / around the whole body ; pump blood at higher pressure;	max [1]	
(iii)	muscular walls contract ; raises blood pressure ; direction of flow controlled by valves ;	max [2]	A valves between atria and ventricles close when ventricles contract; open ventricles relax;
(b) (i)	X aorta ; Y hepatic portal vein ;	[2]

Question	Answer	Marks	Additional Guidance								
(ii)	<table border="1"> <tr> <td>description of blood</td> <td>number of the blood vessels</td> </tr> <tr> <td>has the highest concentration of oxygen</td> <td>1 ;</td> </tr> <tr> <td>has the highest concentration of urea</td> <td>5 ;</td> </tr> <tr> <td>has the lowest concentration of urea</td> <td>4 ;</td> </tr> </table>	description of blood	number of the blood vessels	has the highest concentration of oxygen	1 ;	has the highest concentration of urea	5 ;	has the lowest concentration of urea	4 ;	[3]	
description of blood	number of the blood vessels										
has the highest concentration of oxygen	1 ;										
has the highest concentration of urea	5 ;										
has the lowest concentration of urea	4 ;										
(c)	not enough antibodies = L ; long clotting time = N ; quickly exhausted = M ;	[3]									
		[Total 14]									
8	<u>homeostasis</u> ; <u>brain</u> ; <u>vasodilation</u> ; <u>sweat</u> ; <u>evaporation</u> ;	[5]									
		[Total 5]									
9 (a) (i)	group of organisms ; of same species ; living in same area ; at the same time ;	max [3]	R similar species								

Page 11	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – October/November 2015	0610	23

Question	Answer	Marks	Additional Guidance
(ii)	food supply; other (named) resource; predation; disease; alien species / AW; AVP;	max [3]	A environmental changes
(b) (i)	Q = log / exponential phase; R = stationary phase;	[2]	
(ii)	population is declining / numbers of individuals reducing ; more individuals dying than being born ; food in short supply ; disease present killing individuals / predators killing more individuals / build-up of toxins / waste product ;	max [2]	
(iii)	long lag phase ; no stationary phase present; no death phase present; time in years as opposed to days;	max [3]	A description of phases
		[Total 13]
