Paper 3 Theory (Core)

October/November 2021

MARK SCHEME

Maximum Mark: 80

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2021 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of **12** printed pages.

PUBLISHED**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Science-Specific Marking Principles

1 Examiners should consider the context and scientific use of any keywords when awarding marks. Although keywords may be present, marks should not be awarded if the keywords are used incorrectly.

2 The examiner should not choose between contradictory statements given in the same question part, and credit should not be awarded for any correct statement that is contradicted within the same question part. Wrong science that is irrelevant to the question should be ignored.

3 Although spellings do not have to be correct, spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. ethane / ethene, glucagon / glycogen, refraction / reflection).

4 The error carried forward (ecf) principle should be applied, where appropriate. If an incorrect answer is subsequently used in a scientifically correct way, the candidate should be awarded these subsequent marking points. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

5 'List rule' guidance

For questions that require *n* responses (e.g. State **two** reasons ...):

- The response should be read as continuous prose, even when numbered answer spaces are provided.
- Any response marked *ignore* in the mark scheme should not count towards *n*.
- Incorrect responses should not be awarded credit but will still count towards *n*.
- Read the entire response to check for any responses that contradict those that would otherwise be credited. Credit should **not** be awarded for any responses that are contradicted within the rest of the response. Where two responses contradict one another, this should be treated as a single incorrect response.
- Non-contradictory responses after the first *n* responses may be ignored even if they include incorrect science.

6 Calculation specific guidance

Correct answers to calculations should be given full credit even if there is no working or incorrect working, **unless** the question states 'show your working'.

For questions in which the number of significant figures required is not stated, credit should be awarded for correct answers when rounded by the examiner to the number of significant figures given in the mark scheme. This may not apply to measured values.

For answers given in standard form (e.g. $a \times 10^n$) in which the convention of restricting the value of the coefficient (a) to a value between 1 and 10 is not followed, credit may still be awarded if the answer can be converted to the answer given in the mark scheme.

Unless a separate mark is given for a unit, a missing or incorrect unit will normally mean that the final calculation mark is not awarded. Exceptions to this general principle will be noted in the mark scheme.

7 Guidance for chemical equations

Multiples / fractions of coefficients used in chemical equations are acceptable unless stated otherwise in the mark scheme.

State symbols given in an equation should be ignored unless asked for in the question or stated otherwise in the mark scheme.

Mark scheme abbreviations

- ; separates marking points
- / alternative responses for the same marking point
- R reject the response
- A accept the response
- I ignore the response
- ecf error carried forward
- AVP any valid point
- ora or reverse argument
- AW alternative wording
- underline actual word given must be used by candidate (grammatical variants excepted)
- () the word / phrase in brackets is not required but sets the context

Question	Answer	Marks	Guidance
1(a)(i)	left ventricle ; septum ; valve ; right atrium ;	4	labels in this order starting clockwise from top right side of the diagram
1(a)(ii)	vena cava ; pulmonary artery ; pulmonary vein ; aorta ;	4	
1(b)	<i>any three from:</i> stress ; smoking ; genetic (predisposition) ; age ; sex ; AVP ;;; e.g. lack of exercise / high blood pressure / high (blood) cholesterol / diabetes / obesity	3	

Question	Answer	Marks	Guidance
2(a)(i)	A – transpiration ; B – condensation ; C – evaporation ; D – precipitation ;	4	
2(a)(ii)	<i>any three from:</i> water, absorbed / taken up ; by osmosis ; into root hair cells ; across the, cell membrane / partially permeable membrane ;	3	
2(b)(i)	(location) 3 ;	1	
2(b)(ii)	<i>species:</i> mayfly / nymph ; <i>reasons – maximum of two from:</i> there are no mayfly nymphs, after location 3 / in locations 3, 4 and 5 ; sewage / polluted water, enters the river, after location 2 / before location 3 ; sewage is a source of pollution ;	3	
2(b)(iii)	bloodworm / sludge worm ;	1	
2(b)(iv)	87.7(%) ;;;	3	MP1 correct readings from table (73 & 9) MP2 correct calculation MP3 correct rounding to one decimal place ecf MP2 and MP3 from incorrect readings / calculation

Question	Answer	Marks	Guidance
3(a)	<div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;">are carbohydrates.</div> <div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;">are catalysts that slow down reactions and remain unchanged.</div> <div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;">are catalysts that speed up reactions and are changed.</div> <div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;">are catalysts that speed up reactions and remain unchanged.</div> <div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;">are lipids.</div> <div style="border: 1px solid black; padding: 5px;">are proteins.</div> <div style="text-align: right;">;;</div>	2	one mark for each correct line R each additional line
3(b)	S ;	1	
3(c)	breakdown of large molecules into small molecules ; insoluble molecules to soluble molecules ;	2	

Enzymes

Question	Answer				Marks	Guidance
3(d)(i)	part of the alimentary canal		pH values	enzyme letter	2	one mark per two correct letters
	duodenum		5.5	V		
	ileum		8.0	X		
	mouth		6.7	W		
	stomach		1.5	U		
3(d)(ii)	colon / rectum / anus ;				1	
3(e)(i)	killing bacteria / microorganisms ;				1	
3(e)(ii)	hydrochloric ;				1	
3(f)	enzyme	substrate	products	organ that secretes the enzyme	6	
	amylase	starch	(named) (simple) sugars / glucose ;	salivary glands / pancreas ;		
	lipase ;	fats / oils ;	fatty acids and glycerol	pancreas		
	protease	protein ;	amino acids	stomach / small intestine / pancreas ;		

Question	Answer	Marks	Guidance																
4(a)	<table border="0" style="width: 100%; border-collapse: collapse;"> <tr> <td style="border: 1px solid black; padding: 5px; width: 80%;">a chemical reaction in a cell</td> <td style="border: 1px solid black; text-align: center; width: 20%;"><input checked="" type="checkbox"/></td> </tr> <tr> <td style="border: 1px solid black; padding: 5px;">breaks down nutrient molecules</td> <td style="border: 1px solid black; text-align: center;"><input checked="" type="checkbox"/></td> </tr> <tr> <td style="border: 1px solid black; padding: 5px;">coordinates and regulates body functions</td> <td style="border: 1px solid black; text-align: center;"><input type="checkbox"/></td> </tr> <tr> <td style="border: 1px solid black; padding: 5px;">does not use oxygen</td> <td style="border: 1px solid black; text-align: center;"><input checked="" type="checkbox"/></td> </tr> <tr> <td style="border: 1px solid black; padding: 5px;">affects reaction times and self-control</td> <td style="border: 1px solid black; text-align: center;"><input type="checkbox"/></td> </tr> <tr> <td style="border: 1px solid black; padding: 5px;">produces alcohol and carbon dioxide in yeast</td> <td style="border: 1px solid black; text-align: center;"><input checked="" type="checkbox"/></td> </tr> <tr> <td style="border: 1px solid black; padding: 5px;">uses carbon dioxide</td> <td style="border: 1px solid black; text-align: center;"><input type="checkbox"/></td> </tr> <tr> <td style="border: 1px solid black; padding: 5px;">uses oxygen</td> <td style="border: 1px solid black; text-align: center;"><input type="checkbox"/></td> </tr> </table>	a chemical reaction in a cell	<input checked="" type="checkbox"/>	breaks down nutrient molecules	<input checked="" type="checkbox"/>	coordinates and regulates body functions	<input type="checkbox"/>	does not use oxygen	<input checked="" type="checkbox"/>	affects reaction times and self-control	<input type="checkbox"/>	produces alcohol and carbon dioxide in yeast	<input checked="" type="checkbox"/>	uses carbon dioxide	<input type="checkbox"/>	uses oxygen	<input type="checkbox"/>	4	one mark for each correct tick. R each additional tick
a chemical reaction in a cell	<input checked="" type="checkbox"/>																		
breaks down nutrient molecules	<input checked="" type="checkbox"/>																		
coordinates and regulates body functions	<input type="checkbox"/>																		
does not use oxygen	<input checked="" type="checkbox"/>																		
affects reaction times and self-control	<input type="checkbox"/>																		
produces alcohol and carbon dioxide in yeast	<input checked="" type="checkbox"/>																		
uses carbon dioxide	<input type="checkbox"/>																		
uses oxygen	<input type="checkbox"/>																		
4(b)	lactic acid ;	1																	

Question	Answer	Marks	Guidance
4(c)	<i>any three from:</i> active transport ; muscle contraction ; protein synthesis ; cell division ; growth ; passage of nerve, impulses / signals ; maintenance of a constant body temperature ; AVP ;;	3	

Question	Answer	Marks	Guidance
5(a)	gamete ; meiosis ; fuse ; zygote ; different from ;	5	
5(b)	R ; S ;	2	
5(c)	female will be XX (and male is XY)(chromosomes) / sex chromosomes will ,be the same / look the same ;	1	
5(d)	<i>any four from:</i> large petals ; colourful / bright, petals ; scented ; nectar / nectaries ; anthers / stigmas, inside the flower ; sticky / spiky, pollen grains ; less pollen made (than wind pollinated) ; AVPs ;; e.g. larger / heavy, pollen grain	4	
6(a)(i)	carbon dioxide + water → ; glucose + oxygen ;	2	

Question	Answer	Marks	Guidance
6(a)(ii)	sun / light ;	1	
6(a)(iii)	chloroplast ;	1	
6(b)(i)	20 ;	1	
6(b)(ii)	<i>idea of</i> (0.10 au) lowest concentration (of carbon dioxide) that produces the, maximum / highest, number of bubbles ; number of bubbles, does not increase / stays constant, after concentration (of carbon dioxide) 0.10 au ;	2	
6(b)(iii)	<i>prediction:</i> fewer / no, bubbles produced ; <i>explanation:</i> chemical reactions or photosynthesis, are slower / less photosynthesis / ref. to enzymes being less active ;	2	
6(c)	methane / AVP ;	1	

Question	Answer	Marks	Guidance
7(a)	homeostasis ;	1	
7(b)	receptors ; effectors ; air ; muscle ; decreases ;	5	
7(c)	<i>any two from:</i> alcohol / heroin / AVP ;;	2
