

Mark Scheme (Results)

Summer 2015

Pearson Edexcel International GCSE Mathematics A (4MAO) Paper 4H

Pearson Edexcel Level1/Level 2 Certificate Mathematics A (KMA0) Paper 4H

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at <u>www.edexcel.com</u> or <u>www.btec.co.uk</u>. Alternatively, you can get in touch with us using the details on our contact us page at <u>www.edexcel.com/contactus</u>.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of **learning, for all kinds of people, wherever they are in the world. We've been** involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: <u>www.pearson.com/uk</u>

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme.

Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.

- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.
- Types of mark
 - o M marks: method marks
 - o A marks: accuracy marks
 - B marks: unconditional accuracy marks (independent of M marks)
- Abbreviations
 - o cao correct answer only
 - o ft follow through
 - o isw ignore subsequent working
 - o SC special case
 - o oe or equivalent (and appropriate)
 - o dep dependent
 - o indep independent
 - o eeoo each error or omission
 - o awrt -answer which rounds to

PEARSON

• No working

If no working is shown then correct answers normally score full marks

If no working is shown then incorrect (even though nearly correct) answers score no marks.

• With working

If there is a wrong answer indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.

If it is clear from the working that the "correct" answer has been obtained from incorrect working, award 0 marks.

Any case of suspected misread loses A (and B) marks on that part, but can gain the M marks.

If working is crossed out and still legible, then it should be given any appropriate marks, as long as it has not been replaced by alternative work.

If there is a choice of methods shown, then no marks should be awarded, unless the answer on the answer line makes clear the method that has been used.

If there is no answer on the answer line then check the working for an obvious answer.

• Ignoring subsequent work

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question: eg. Incorrect cancelling of a fraction that would otherwise be correct.

It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect eg algebra.

Transcription errors occur when candidates present a correct answer in working, and write it incorrectly on the answer line; mark the correct answer.

• Parts of questions

Unless allowed by the mark scheme, the marks allocated to one part of the question CANNOT be awarded in another. Apart from Questions 7c, 13, 19a, 20b, 21b and 23, where the mark scheme states otherwise, the correct answer, unless clearly obtained by an incorrect method, should be taken to imply a correct method.

Question	Working	Answer	Marks	Comments
1	$1 - \frac{2}{5}$ or $\frac{3}{5}$ oe			M1 or for $\frac{2}{5} \times 20$ oe or 8 or $\frac{8}{20}$
	$\frac{3}{5} \times 20$ oe		3	M1 (dep) for 20 – '8'
		12		A1 NB: $\frac{12}{20}$ gains M2, A0
				Total 3 marks

2	15 ÷ (6 – 4) (=7.5)			M1 or use of cancelled ratios (eg $3: 6: 4 = 0.75: 1.5: 1$,
	"7.5" × 3 (=22.5)		3	M1dep $15\div0.5(=30)$) or cancelled ratios, (eg 30×0.75)
				or M2 for $15 \div \frac{2}{3}$ oe
		22.5(0)		A1 oe
	Alternative			
	$\frac{6n}{13} - \frac{4n}{13} = 15$ or $\frac{2n}{13} = 15$ oe or $15 \times \frac{13}{2}$ oe or			M1
	n = 97.5		3	
	$\frac{3}{3+6+4}$ × 97.5 oe		3	Mldep
		22.5(0)		A1 oe
	Alternative			
	(3:6:4)21:42:28 and 24:48:32			M1 For using ratios and seeing 21 : 42 : 28 and 24 : 48 : 32
	22.5 : 45 : 30	22.5(0)	3	M1dep Correct line or (21+24)÷2 A1 oe
				Total 3 marks

3 (a)(i)		90	1	B1	
(a)(ii)		25	1	B1	
(b)	1	ine from		B2	B1 for line from ((13 45, 45) to (15
	and	5) to (15 15, 45) d line from 45) to (16 30, 0)	2		15, 45) or for a line from (<i>x</i> , 45) to (16 30, 0) where x is a time before 1630
					Total 4 marks

4 (a)	$(25+1) \div 2 \text{ or } 13 \text{ or } 12.5$	2	2	M1 A1	or listing scores and clear attempt to find middle value
(b)	$1 \times 9 + 2 \times 6 + 3 \times 3 + 4 \times 2 + 5 \times 1 + 4 \times 6$ oe (=67)			M1	sight of at least 4 products and intention to add
	"67"÷25 or $\frac{9+12+9+8+5+24}{25}$ oe (allow one error in a product)		3	M1dep	for division of sum of products by 25 (can be their 25 if evidence of adding frequencies)
		2.68 or $2\frac{17}{25}$		A1	accept 2.7 or 3 if preceded by $\frac{67}{25}$
					Total 5 marks

5 (a)	y = -x drawn		(2,2)(2,5)(4,5)(4,3)	2	M1 A1	or a congruent shape with the correct orientation in the 1 st quadrant or a correct reflection in y = x
(b)		Rotation about (0, –1) 90° clockwise	3	B1 B1 B1	Rotation (centre) (0, -1) 90° clockwise or -90° or 270° anti- clockwise or +270° NB. If more than one
						transformation given then no marks should be awarded Total 5 marks

6 (a)	angle MRQ (or RMQ) = x or $\frac{180 - y}{2}$		2	M1	could be marked on diagram or for a correct equation in x and y
		180 - 2x		A1	oe eg $2(90 - x)$, $2(180 - x) - 180$ etc
(b)	$(6-2) \times 180$ oe (=720)			M1	or $(180 - 360 \div 6) \times 6$
	"720" – (90 + 115 + 144 + 87), [720 – 436] or 284		4	M1dep	
	"284" ÷ 2			M1dep	
		142		Al	
	Alternative				
	180-90(=90), 180-115(=65), 180-144(=36), 180-87(=93) 360 - ("90"+"65"+"36"+"93"), [360-284] (= 76) 180 - ("76" ÷ 2)		4	M1 M1dep M1dep	A correct method to find each of the exterior angles at A,C,D & E – angles could be seen on diagram. A correct method to find the total of the remaining exterior angles A correct method to find k
		142		A1	
					Total 6 marks

7	(a)		24 - 18y	1	B1	
	(b)		<i>e</i> (<i>e</i> +4)	1	B1	Allow $(e+0)(e+4)$ ignore missing bracket at end
	(c)	Eg. $7x - 2x = -3 - 8$		3	M1	for correct rearrangement with x terms on one side and numbers on the other or the correct simplification of either x terms or numbers on one side in a correct equation eg. $5x + 8 = -3$; $7x = 2x - 11$
		5x = -11			M1	Award also for $-5x = 11$
			-2.2 oe		A1	-2.2 oe dependent on at least M1 awarded; if no correct algebraic working then award no marks
	(d)	$y^2 + 10y - 2y - 20$		2	M1	for 3 correct terms out of 4 or for 4 correct terms ignoring signs or for $y^2 + 8y + c$ for any non-zero value of c or for + $8y - 20$
			$\frac{y^2 + 8y - 20}{4e^2 f(5e^3 f - 4)}$		A1	cao
	(e)		$4e^{2}f(5e^{3}f-4)$	2	B2	B1 for a correct but incomplete factorised answer with a minimum of 2 out of 4 , e^2 or f outside the bracket, ie $4e^2 (5e^3f^2 - 4f), 4f(5e^5f - 4e^2), e^2f(20e^3f - 16),$ $4ef(5e^4f - 4e), 2e^2f(10e^3f - 8)$ or $4e^2f(a$ two term algebraic expression)
						Total 9 marks

8	$\cos 39 = \frac{11.3}{x} \text{ oe}$		2	M1	or $\frac{x}{\sin 90} = \frac{11.3}{\sin(180 - 90 - 39)}$
	$(x=) \ \frac{11.3}{\cos 39}$		3	M1	or $x = \frac{11.3}{\sin(180 - 90 - 39)} \times \sin 90$
		14.54		A1	awrt 14.54
	Alternative				
	$\tan 39 = \frac{y}{11.3} ; y = 9.15$ "9.15" ² + 11.3 ² = x ² oe			M1	Must get to correct Pythagoras statement
	$(x =)\sqrt{"9,15"^2+11.3^2}$ oe			M1	
		14.54		A1	awrt 14.54 (NB: 14.5 with no working gains M0A0)
					Total 3 marks

9	(a)	$-5-4 < x \le 3-4$			M1	subtraction of 4 from either side in
						an inequality or one side of
				2		inequality correct (eg $x \le -1$) or
						for $-5-4(=-9)$ and $3-4(=-1)$
			$-9 < x \le -1$		A1	Accept $x > -9$, $x \le -1$
	(b)		-3, -2, -1, 0, 1	2	B2	B1 for one omission or addition
						Total 4 marks
