

GCSE MARKING SCHEME

SUMMER 2018

**GCSE
CHEMISTRY – COMPONENT 1**

**C410U10-1
C410UA0-1**

INTRODUCTION

This marking scheme was used by WJEC for the 2018 examination. It was finalised after detailed discussion at examiners' conferences by all the examiners involved in the assessment. The conference was held shortly after the paper was taken so that reference could be made to the full range of candidates' responses, with photocopied scripts forming the basis of discussion. The aim of the conference was to ensure that the marking scheme was interpreted and applied in the same way by all examiners.

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners' conference, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about this marking scheme.

GCSE CHEMISTRY COMPONENT 1: Concepts in Chemistry**MARK SCHEME****GENERAL INSTRUCTIONS**Recording of marks

Examiners must mark in red ink.

One tick must equate to one mark (apart from the questions where a level of response mark scheme is applied).

Question totals should be written in the box at the end of the question.

Question totals should be entered onto the grid on the front cover and these should be added to give the script total for each candidate.

Marking rules

All work should be seen to have been marked.

Marking schemes will indicate when explicit working is deemed to be a necessary part of a correct answer.

Crossed out responses not replaced should be marked.

Credit will be given for correct and relevant alternative responses which are not recorded in the mark scheme.

Extended response question

A level of response mark scheme is used. Before applying the mark scheme please read through the whole answer from start to finish. Firstly, decide which level descriptor matches best with the candidate's response: remember that you should be considering the overall quality of the response. Then decide which mark to award within the level. Award the higher mark in the level if there is a good match with both the content statements and the communication statements.

Marking abbreviations

The following may be used in marking schemes or in the marking of scripts to indicate reasons for the marks awarded.

cao = correct answer only
ecf = error carried forward
bod = benefit of doubt

Foundation Tier only questions

Question		Marking details		Marks available					
				AO1	AO2	AO3	Total	Maths	Prac
1	(a)		<p>oxygen 78%</p> <p>nitrogen 21%</p> <p>carbon dioxide 0.9%</p> <p>argon 0.04%</p> <p>all correct (2) any two correct (1)</p>	2			2		
	(b)		carbon dioxide decreased and oxygen increased <input checked="" type="checkbox"/>	1			1		
	(c)		<p>(sulfur burns) forming sulfur dioxide (1)</p> <p>(sulfur dioxide) reacts with rain / water OR (which forms sulfuric acid/sulfurous acid) (1)</p> <p>kills forests / kills fish / damages statues / corrodes metals (1)</p>	3			3		
	(d)		<p>since 1995 there has been a small decrease in the amount of sulfur dioxide released <input checked="" type="checkbox"/></p> <p>the amount of sulfur dioxide decreased rapidly between 1990 and 1995 <input checked="" type="checkbox"/></p>			2	2	2

Question				Marking details		Marks available					
						AO1	AO2	AO3	Total	Maths	Prac
2	(a)	(i)	I	B C A	all correct (2) any one correct (1)	2			2		2
			II	step B step C step A	use up the acid / neutralise the acid / form zinc chloride (1) remove (unreacted) zinc carbonate (1) remove / evaporate water (1)				3		3
		(ii)		ZnCl ₂	<input checked="" type="checkbox"/>		1		1		
		(iii)		zinc / zinc oxide / zinc hydroxide accept Zn / ZnO / Zn(OH) ₂		1			1		
	(b)	(i)		3				1	1		1
		(ii)		red and blue – both needed				1	1		1
		(iii)		0.43 / 0.4 (2) if answer incorrect award (1) for $\frac{3}{7}$			2		2	1	
		(iv)		dots at 'red' and 'yellow' positions – both needed				1	1		1
Question 2 total						6	3	3	12	1	8

Question			Marking details		Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
3	(a)	(i)	mass of iron per gram	0.10 /0.1 (1)						
			mass of iron per kilogram	100 (1)		2		2	2	
		(ii)	C	(1)						
			ecf possible if answer > 120 given in part (i)							
			produces the most iron (1)				2	2		
		(iii)	83	(2)	1	1		2	2	
			if answer incorrect award (1) for $\frac{29}{35}$ / 82.86 / 82.857 / 82.9							
	(b)		air/oxygen and water are needed for rusting to take place (1)							
			salt speeds up rusting (1)				2	2		2
	(c)		painting stops air and/or water (getting to iron) (1)							
			sacrificial protection zinc above iron in reactivity series / zinc more reactive than iron (1) zinc corrodes instead of iron / zinc corrodes before iron (1)		3			3		
			do not accept reference to 'zinc rusts instead of iron'							
	(d)		Fe ₂ O ₃			1		1
